

**Build a home library with plug-in modules  
that let learning continue as new skills grow.**

The TI Learning Center's growing family of plug-in modules adds a valuable dimension to the usefulness and longevity of Speak & Spell.\* Like Speak & Spell, these word modules are designed under educators' guidance to maintain your child's interest as his or her skills grow and to offer a learning system that reinforces what is usually being taught in the classroom.

Small enough to hold in the palm of a hand, each module simply slips into the back of your Speak & Spell and offers a whole new vocabulary list that focuses on a specific language arts learning objective.

This easy, expandable approach lets you build a broad home study program while it offers you an exceptional opportunity to share and shape your child's learning experiences. Grade level ranges are suggested for each module to serve as a parent's guide, but the system of modules can be used in any sequence to provide valuable review or an extra challenge. And all modules come with colorful, illustrated activity books that stimulate learning and make it more fun for children — and parents.

**If you can't find the modules you want,  
or the adapter, you may obtain them directly from  
Texas Instruments. Call toll free within  
the Continental U.S. at (800) 858-1802,  
or in Texas, (800) 692-1353.**
