SAT ACT AP IB

NEW! Home Screen
View the user-friendly home screen and perform quick calculations and graphs using the Scratchpad feature.

NEW! Touchpad Keypad
The TI-Nspire handheld is the first graphing handheld with a touchpad for navigating screens, menus and objects.

NEW! Letter keys
Quick-touch alpha letter keys at the bottom of the keypad make it easy to enter text.

TI-Nspire™ Handheld with Touchpad

TI-Nspire™ technology combines enhanced graphing capabilities with computer features, extending beyond traditional graphing possibilities.

- » Imagine exploring a quadratic function graphically, tabularly, and symbolically – all at the same time! Exploring math with different representations helps students understand there are multiple ways to solve a problem.
- » Access the applications used to on a computer in the palm of your hand, including a quick calc, notepad, tables and spreadsheet, and advanced graphing capabilities.
- » View individual representations, or as many as four, all at one time. Exploring math in different ways can help students make meaningful connections.
- » See cause-and-effect scenarios in real time. Change a problem's properties and see instantly how it impacts other "linked" representations of the same problem.
- » Save work from one class to the next. Open a saved TI-Nspire document from the handheld or software – just like on a computer.

Rechargeable-ready
TI-Nspire and TI-Nspire CAS handhelds with Touchpad have the capability to use TI-Nspire Rechargeable Batteries (sold separately).
For more information about the TI-Nspire Rechargeable Battery, visit education.ti.com/recharge.

TI-Nspire CAS Learning Handheld
» Use the same TI-Nspire functions plus a built-in Computer Algebra System (CAS). Permitted on SAT*, AP*, PSAT/NMSQT* and Praxis exams, and many state tests.
**The TI-84 Plus Keypad is not compatible with the TI-Nspire CAS handheld.

NEW! TI-Nspire Navigator™ System
Engage students and encourage participation through a completely wireless network of TI-Nspire or TI-Nspire CAS handhelds.
» Instantly assess student understanding and adjust instruction as needed.
» Have students project their work on the handheld from anywhere in the classroom.

Rechargeable-ready
TI-Nspire and TI-Nspire CAS handhelds with Touchpad have the capability to use TI-Nspire Rechargeable Batteries (sold separately). Users have the choice to power the handhelds by:
» AAA alkaline (non-rechargeable) batteries only – included
» The TI-Nspire Rechargeable Battery only (available separately)
» A combination of the TI-Nspire Rechargeable Battery (available separately) and AAA alkaline (non-rechargeable) batteries (included in package)
For more information about the TI-Nspire Rechargeable Battery, visit education.ti.com/recharge.

TI-84 Plus Keypad for TI-Nspire handhelds
» Available by request, this keypad makes it possible to use TI-Nspire handhelds and TI-84 Plus family graphing calculators in the same classroom. You can feel comfortable and confident adding TI-Nspire technology to your syllabus.
The TI-84 Plus Keypad operates only on the TI-Nspire handheld and is not compatible with the TI-Nspire CAS handheld.

EZ-Spot Teacher Packs
» Distinguish handhelds as "SCHOOL PROPERTY" with bright yellow slide cases and back frames.
» Keep track of classroom-issued handhelds more easily.
» Special order EZ-Spot Teacher Packs through a TI Instructional Dealer.
Visit education.ti.com/dealers

TI-Nspire™ Computer Software

Now in color
The vibrant full-color display helps further accentuate graphical, statistical, geometric and numeric representations on screen.

Customizable Software Views
Arrange software panels with thumbnails of your pages, math templates, symbols, and function catalog to look and function the way you want.

NEW! Print capability
Print out electronic TI-Nspire documents, including math content, exams, reports, class activities and homework assignments.

Smart, simple navigation
The TI-Nspire software interface makes it easier to select menus, move through windows, open folders and operate other functions.

TI-Nspire™ Teacher Software

Virtual on-screen keypad
Educators can select the TI-Smartview emulator feature to display a virtual on-screen handheld with the same keypad functions as the TI-Nspire handheld. Project a full interactive TI-Nspire handheld alongside a large handheld screen, and integrate the emulator's features with interactive white boards and digital projectors.

Question application
This application lets educators easily create and send questions to students during class. Create questions such as: open response, custom choice, true/false, yes/no, right/wrong, agree/disagree, always/ sometimes/never and strongly agree/strongly disagree.

Site deployment and activation
Centralized deployment over the school's, district's or campus's network simplifies and speeds up the process of downloading and activating TI-Nspire software on multiple computers.

TI-Nspire Family of Software is PC and Mac® compatible. Mac is a registered trademark of Apple Inc.

TI-Nspire Student Software
It's all in one package. Educators can add TI-Nspire technology to their syllabus, knowing that students can purchase the handheld and student software together. Another advantage: the TI-Nspire handheld is permitted on college entrance and end-of-course exams, including a growing list of state tests.

| Software Licensing Option | |

Classroom-ready Activities via email

Subscribe to receive weekly and monthly activities emails for Algebra 1, Algebra 2, Geometry, Precalculus, Calculus, Statistics and Physics that are aligned to state, textbook, NCTM and NSES standards. Sign up on TIMath.com and TIPhysics.com.

Activities Exchange

Educators have access to more than 3,000 free online math and science activities. Browse by subject, state, national or Canadian provincial standards, or by textbook, and download classroom-ready activities. Share your own activities with other educators. Visit education.ti.com/exchange.

Getting Started Series

Free online booklets feature activities that introduce new users to the key features of TI technology, including:

- » Introducing TI-Nspire Technology
- » TI-Nspire: High School Mathematics
- » TI-Nspire: Developmental Algebra

Visit education.ti.com/us/gettingstarted.

FREE! TI-Nspiring Times Newsletter

By and for TI-Nspire users, the TI-Nspiring Times Newsletter contains the latest information on TI-Nspire and TI-Nspire CAS family of handhelds. Published two times a year and delivered to your mailbox. Subscribe at education.ti.com/updates.

Textbooks

An increasing number of publishers are adding TI-Nspire technology content. TI-Nspire activities offered by different publishers can help educators give students the opportunity to interactively explore concepts first introduced in the textbook.

For more information, visit
education.ti.com/activities.

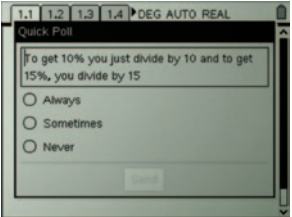

NEW! TI-Nspire Navigator System

- » Wirelessly share documents and instantly assess each student's understanding at any point during the lesson.
- » Transfer documents between your classroom computer and all student handhelds simultaneously.
- » Have students show their work to the class from anywhere in the room.
- » Collect activities, homework and tests, and save them on the computer to grade, record and archive.

The TI-Nspire Navigator System is based on TI-Navigator research studies that show a positive impact on student engagement, understanding and performance. To learn more, visit education.ti.com/research.

TI-Nspire Navigator Wireless Cradles
These rechargeable wireless cradles slide on each TI-Nspire or TI-Nspire CAS handheld to create a completely wireless network, and are included with the TI-Nspire Navigator System.

Quick Poll
Send a "quick poll" for an immediate look at overall classroom progress.

Ongoing Assessment
Use electronic documents, such as multiple-choice questions, to quickly assess student understanding.

Live Presenter
Students have the ability to present their work from anywhere in the classroom.

Screen Capture
Capture the screen of student handhelds on your computer to monitor progress and see who needs guidance.

TI Connect-to-Class™ Teacher Software Kit
Connect-to-Class teacher software allows the teacher to quickly and easily send and collect TI-Nspire documents, student work and data to and from up to eight TI-Nspire or TI-Nspire CAS handhelds at the same time.* Students connect their handhelds to the teacher's computer through the USB hubs provided with the software.

TI Connect-to-Class™ Teacher Software Kit connects up to eight handhelds at one time to the teacher's computer.
*Not compatible with the TI-84 Plus keypad.

- Share documents with multiple students.**
- » Save valuable class time and allow students to start exploring TI-Nspire documents immediately.
 - » Send documents to students at the beginning of class.
 - » Collect assignments and unfinished work.
 - » Redistribute collected files over multiple class periods.
 - » Update TI-Nspire and TI-Nspire CAS operating systems.
 - » Manage documents generated by students.
 - » Delete files and folders before the handheld is used by the next student.

How to get Connect-to-Class Software FREE!
Simply purchase a TI-Nspire or TI-Nspire CAS Teacher Bundle or Teacher Pack, and you'll find information on how to get a FREE Connect-to-Class Teacher Software Kit.
For more information, visit education.ti.com/nspire/connecttoclass.

With TI-Nspire Computer Link Software, you or your students can also connect a single TI-Nspire or TI-Nspire CAS handheld to a computer.

Build Student Understanding and Assess Progress with Electronic Documents.
The wireless TI-Nspire Navigator system helps bring you greater insight into exactly what your students need to better understand the math. You can instantly evaluate their problem-solving steps within TI-Nspire documents and have them share work with the class while leading an activity.
For more information, visit TI-Nspire.com.

ON TESTING
SAT ACT AP IB

Shown in EZ-Spot Yellow

TI-84 Plus Silver Edition

This popular graphing calculator is fully loaded with features designed to help students gain an academic edge in math and science and perform well on high-stakes exams.

- » Greatly expands performance with more than 20 preloaded Apps and nine times the memory of the TI-83 Plus.
- » Latest operating system download* – version 2.53 – features MathPrint™ Mode, which lets you input and view math symbols and formulas, including stacked fractions, exactly as they appear in textbooks.
- » Download this free OS update for your teaching calculator and TI-SmartView™ emulator software at education.ti.com/84.
- » Easily disables and restores Apps for tests with TI TestGuard 2.0 software and Press-to-Test features.

PERMITTED
ON TESTING
SAT ACT AP IB

TI-84 Plus

- » Expands performance with more than 10 preloaded Apps and three times the memory of the TI-83 Plus.
- » Provides fast computer-to-calculator data transfer with a USB cable included.
- » Help protect school property with EZ-Spot Teacher Packs of 10 calculators.

PERMITTED
ON TESTING
SAT ACT AP IB

(available by request)

TI-84 Plus Keypad for TI-Nspire

Available by request, this keypad makes it possible to use TI-Nspire handhelds and TI-84 Plus family graphing calculators in the same classroom. You can feel comfortable and confident adding TI-Nspire technology to your syllabus.

The TI-84 Plus Keypad operates only on the TI-Nspire handheld and is not compatible with the TI-Nspire CAS handheld.

PERMITTED
ON TESTING
SAT ACT AP IB

TI-83 Plus

- » Provides easy-to-use graphing calculator functions for math and science.
- » Helps students graph and compare functions, and plot and analyze data.

TI-Navigator™ System

Raise student engagement, and instantly assess student understanding with wireless communication between students' TI-84 Plus family graphing calculators and the teacher's computer.

Data Collection

Make math and science exciting and interactive for the entire class by combining the TI-84 Plus family with real-world data collection tools from TI and Vernier Software & Technology.™

TI-SmartView™ Emulator Software

Explore concepts with the entire class by presenting large representations of the graphing calculator screen and keypad. TI-SmartView for the TI-84 Plus family easily integrates with interactive whiteboards and digital projectors. Order a 30-day trial at education.ti.com/smartview.

Curricular Materials that Engage Students

- » Free classroom-ready, subject-specific activities for the TI-84 Plus Silver Edition are easy to download at TlMath.com.
- » Textbooks and supplements from leading publishers incorporate TI-84 Plus family graphing calculator content for math and science.

Accessories to Enhance the TI-84 Plus Family

- » Customizable faceplates and slide cases come in more than a dozen colors.
- » Customizable GraphiTI slide case stickers personalize the look of the TI-84 Plus and TI-84 Plus Silver Edition.

EZ-Spot™ “School Property”

Help secure school investment with EZ-Spot Teacher Packs of 10 graphing calculators, featuring bright yellow covers and “School Property” inscription (shown at far left).

TI-SmartView™ emulator software helps present work to the entire class.

Cabri™ Jr.
Engages students with interactive geometry.

Inequality Graphing
Graphing and exploration of inequalities.

Periodic Table
Graphical representation of, and helpful info about, the elements.

StudyCards
Electronic flash cards can be created with software or downloaded for review and practice.

Recognized Graphing Performance

The research-based† TI-84 Plus family sets the standard for traditional graphing calculators year after year. Educators and students alike agree that the TI-84 Plus is a vital tool for effective math and science learning – one that can be counted on at exam time. A wealth of applications, accessories and curricular materials allows tailoring to the classroom.

For more information on the TI-84 Plus family, visit education.ti.com/84.

†Visit education.ti.com/research.

Helping Middle Grades Students Succeed at a Critical Point in Learning

The middle grades can be a turning point for many students. The TI-73 Explorer graphing calculator engages them in understanding math and science at this important moment in their education. With it, they can explore concepts and discover connections that are vital to their success in more advanced courses. Assessment, presentation and even data collection tools connect easily with the TI-73 Explorer to help create a classroom rich in student engagement and understanding.

For more information on the TI-73 Explorer, visit education.ti.com/73.

TI-SmartView™ emulator software helps present work to the entire class.

Preloaded Apps

Area Formulas
Makes learning formula development fun by using animation.

Number Line
Lets students explore operations on real numbers using a graphical expression.

Geoboard™
Lets students experience the power of geometry concepts.

Free Downloadable Apps

- » Building Perspectives
- » DataMate™
- » Explorer Draw™
- » Guess my Coefficients
- » Logic Ladder
- » Math by Hand
- » Matrices
- » Number Curiosities
- » Probability Simulation
- » Puzzle Tanks™
- » Rational Number Rampage
- » SMILE Mathematics
- » Safari Search™
- » SimCalc MathWorlds™
- » StudyCards™
- » Topics in Algebra 1 (Chapters 1-5)

TI-73 Explorer

TI's graphing calculator for middle grades math and science is designed to help students learn important concepts at a critical point in their education.

- » Investigate number patterns using the constant key.
- » Perform operations such as simplifications on stacked fractions.
- » Plot data in pie charts, pictographs, bar charts, scatter plots, histograms and more.
- » Extend performance with many preloaded and downloadable add-on Apps.

TI-Navigator™ System

Receive instant student feedback, perform immediate assessment and adjust instruction at any point in class. Students are more motivated in class and become more active learners.

TI-SmartView™ Emulator Software

Enhance visual learning and student understanding by projecting a large, interactive representation of the calculator keypad and screen to the entire class, using a LCD projector.

Request a free 30-Day Trial from education.ti.com/73smartview.

ViewScreen™ Panel

Lead classroom instruction of concepts and save time teaching handheld basics. Enlarge and project an image of the TI-73 Explorer screen to the entire class using any standard overhead projector.

Data Collection

Link the TI-73 Explorer to TI's CBR 2™ motion detector or CBL 2™ data collection interface using more than 40 Vernier Software & Technology™ sensors and the DataMate App to gather and analyze real-world data.

TI Connectivity Kit

Expand your capabilities by connecting the TI-73 Explorer with a computer or math software such as TI-InterActive!™ with this kit, which includes TI Connect™ Computer Software and the TI Connectivity Cable USB.

Curricular Resources Designed for the Middle Grades

TIMiddleGrades.com offers a wide selection of free classroom-ready activities and curriculum support for middle grades math and science educators and students.

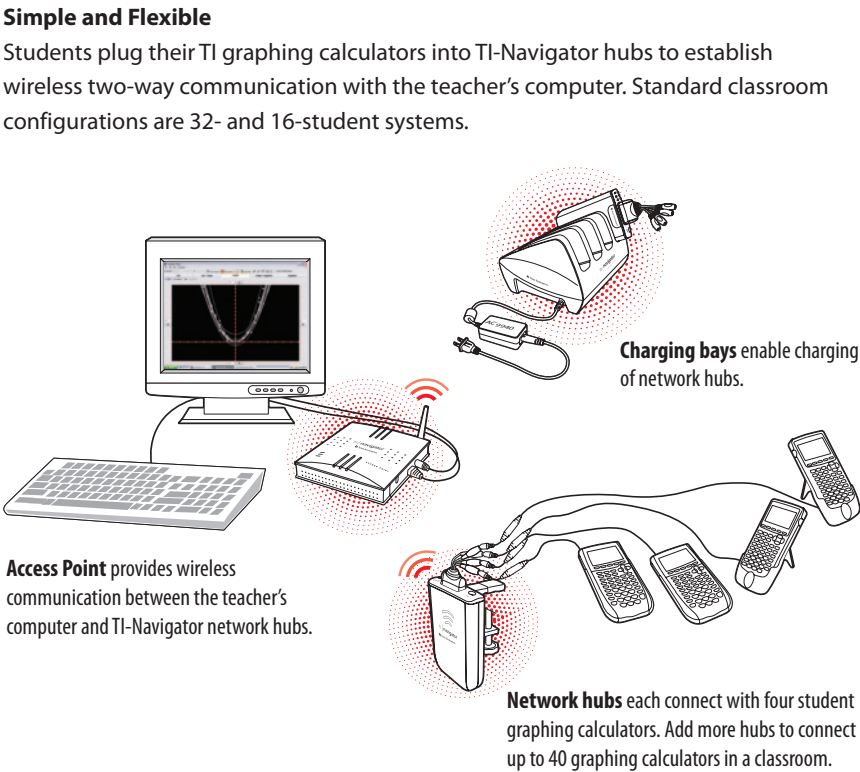

Textbooks and Supplements from leading publishers incorporate TI-73 Explorer graphing calculator content for math and science.

TIMiddleGrades.com

Leading Textbooks and Supplements

The TI-Navigator System works with TI-73 Explorer™ graphing calculators for middle grades math and science.

The TI-Navigator System works with the TI-84 Plus family of graphing calculators and the TI-Nspire™ handheld with the TI-84 Plus Keypad snapped in.

Educator Resources and Support
TI makes it easy to integrate the TI-Navigator system in your classroom.

TI-Navnews Newsletter

Grant-Writing and Funding Resources

TI User Groups

View Every Student's Graphing Calculator Screen
View the graphing calculator screen of every student with a single keystroke, instantly seeing which students are on track with the lesson and which need help.

Quickly Gauge Student Understanding
Student responses to multiple choice and open-ended question types are tabulated and presented on the teacher's computer or projected for the entire class to view. Answers can be kept anonymous.

Discover Real-World Learning with TI Data Collection
A variety of TI data collection devices interface with the TI-Navigator system. Every student's collected data can instantly be displayed and discussed.

Engage the Entire Class in Fun and Exciting Ways
Students can individually contribute their own work, to create a unique view of the whole class's work, allowing the teacher to assess student responses and adjust instruction when needed.

The TI-Navigator System Helps Educators Engage Every Student and Make the Most of Class Time.

With the TI-Navigator System, educators can view student coursework and performance, check problem-solving techniques and guide student work, at any point during class. Plus automatically save, collect, grade and record students' calculator work, and make fast transfers of classroom materials. For more information, visit education.ti.com/nav.

TI-Navigator System

Research† shows that effective use of the TI-Navigator system and compatible TI graphing calculators can increase student interest, engagement and achievement in mathematics and science. Each student's graphing calculator is networked to the teacher's computer to facilitate:

- » Greater student engagement in the classroom.
- » Instant feedback, assessment of each student's understanding and flexibility to adjust instruction.
- » Maximum use of classroom learning time.

†Learn more at education.ti.com/research.

NEW! TI-Nspire™ CAS Handheld with Touchpad

TI-Nspire CAS (Computer Algebra System) technology provides educators and students the ability to perform both symbolic and standard numeric calculations.

- » Shares most of the same enhanced graphing and computer functionality of the TI-Nspire, plus a built-in Computer Algebra System (CAS).
- » Solve equations while avoiding arithmetic errors.
- » Factor, expand expressions and solve for common denominators.
- » Compatible with the TI-Nspire Navigator System.

Permitted on SAT*, AP*, PSAT/NMSQT*, and Praxis™ exams and many state tests.

The TI-84 Plus Keypad is not compatible with the TI-Nspire CAS handheld.

TI-Nspire CAS Teacher Software

TI-Nspire CAS Teacher Software (PC or Mac®) and its built-in TI-SmartView™ emulator give educators the tools to create their own activities and tests and use them to show students the many paths to success.

Software licensing options available.

TI-Nspire CAS Student Software

Having a TI-Nspire™ CAS handheld for class work and using TI-Nspire student software (PC or Mac®) for homework is seamless for students.

Software licensing options available.

Giving Educators the Opportunity to Bring CAS into the Classroom.

TI-Nspire™ CAS technology makes it possible to recognize, simplify and calculate math expressions, while preserving the symbols. This ability to enter and view equations and expressions on screen as they appear in textbooks can be very useful for step-by-step arithmetic, algebraic and calculus calculations.

Visit TI-Nspire.com.

TI-89 Titanium and Voyage™ 200

TI-89 Titanium
An advanced operating system, robust memory, 3-D graphing and CAS technology combine with graphing features to help students understand advanced math, science and engineering concepts. Permitted on SAT*, AP*, PSAT/NMSQT* and Praxis™ exams and many state tests. Visit education.ti.com/89.

Voyage 200
Get the same features of the TI-89 Titanium with a full QWERTY keyboard and larger display. Visit education.ti.com/voyage200.

Show Students How Math and Science Shape the World Around Them.

Students learn real-world concepts in science and math, visualizing relationships and solving problems. Data collection with these interfaces and TI graphing calculators is much easier, faster, more accurate and more interactive than with traditional methods.

For more information, visit education.ti.com/datacollection.

Vernier EasyLink®

Plug any one of more than 40 Vernier Software & Technology™ sensors into the EasyLink USB Sensor Interface and immediately begin collecting data, including pH, light and gas pressure.

- » Compatible with the TI-84 Plus families and TI-Nspire handhelds (either keypad) using a direct USB cable connection.

TI Calculator-Based Ranger™ 2 (CBR 2™)

An easy, affordable way to explore motion data in math, physical science and physics. Pivoting head provides versatility and convenience.

- » Compatible with all current TI graphing calculators and TI-Nspire handhelds (either keypad) using a direct USB or I/O cable connection.

TI Calculator-Based Laboratory™ 2 (CBL 2™)

The portable CBL 2 gives students a hands-on, interactive experience with real-world science and math.

- » Multiple channels connect up to four data collection sensors at one time.
- » Compatible with all current TI graphing calculators and TI-Nspire handheld using the TI-84 Plus Keypad.

Data Collection Faceplate

Snap on the TI-84 Plus Silver Edition to highlight only those keys and functions needed for effective data collection. Unique teal color makes it easily recognizable.

Vernier EasyData®

Collect accurate data faster and more easily with this free App, preloaded on the TI-83 Plus and TI-84 Plus families.

- » Supports TI's CBL 2 and CBR 2 and Vernier's LabPro®, EasyTemp and EasyLink interfaces.

Download from education.ti.com/datacollection.

Vernier EasyTemp®

Students can collect and measure temperatures over a wide range (-25°C to 125°C) with this stainless steel USB Temperature Sensor.

- » Connects directly to the USB port of TI-84 Plus family calculators and both TI-Nspire handhelds.

TI Activities Exchange
Educators will find classroom-ready activities and other tools to help students collect their own real-world data and interact with collected data, to reach a deeper understanding of math and science concepts.

Visit education.ti.com/exchange.

TI-30XS MultiView

- » Explore “x-y” tables within a given function with the Table feature.
- » Utilize the List Editor with formulas.

TI-34 MultiView

- » Explore fractions with the 1/x key and Simplification key.
- » Square Root as first function, Integer Division and Mixed Fractions.

For more information and free online tutorials, visit education.ti.com/us/30xsmv and education.ti.com/tutorials.

» TI-30XS MultiView™ and TI-34 MultiView™

Powerful functions and 4-line display combine in TI’s MultiView scientific calculators. Compatible with the TI-30X IIS and TI-34II Explorer Plus™ in the same classroom when in “Classic” mode.

- » See multiple calculations at the same time.
- » Enter stacked fractions, math expressions and symbols as they appear in textbooks.
- » Quickly view fractions, decimals and exact pi terms in alternate forms.
- » Take advantage of 3 lists for statistical data and list conversions.
- » Scroll, edit and investigate important patterns.

Both models available with bright yellow EZ-Spot slide case and back frame in teacher kits.

» TI-Smartview™

TI-SmartView™ emulator software for the TI-30XS MultiView and TI-34 MultiView scientific calculators allows the educator to project an interactive representation of the calculator and comes with unique instructional capabilities.

» TI-30X IIS

Students can broaden their exploration of math and science concepts.

- » Review and edit current or previous entries, and look for patterns with scroll feature.
- » Perform conversions and advanced calculations.

» TI-34II Explorer Plus™

Designed specifically for middle grades math.

- » Perform operations with fractions and mixed numbers.
- » Express results as quotients and remainders.

» TI-15 Explorer™

Ideal calculator for students in grades 3-5. Displays the same number represented in different formats, including stacked fractions.

For more information, visit education.ti.com/15.

» TI-10

Great calculator for students in grades K-3, featuring large, easy-to-use, color-coded keys.

For more information, visit education.ti.com/10.

» TI-108

Durable school calculator appropriate for grades K-3.

For more information, visit education.ti.com/products.

» Teacher Kits

TI scientific and elementary calculators are available in convenient teacher kits, which include 10 calculators, storage caddy, teacher guide with classroom activities, overhead transparency and keyboard poster. EZ-Spot available for MultiView calculators.

Help Younger Students Get a Great Start with a TI-15 Explorer or TI-10 Elementary Calculator.

Give students in grades K-5 a positive introduction to math and science, and prepare them for success in higher grade levels.

- » View entries and results at the same time with the two-line display.
- » Scroll and review entries, observe patterns and correct mistakes.
- » Learn computational skills and number sense.
- » Develop and enhance computational skills and track progress using automated exercises or student-composed problems.

» Online Learning

Webinars

Take advantage of the T³™ webinar series on Math Nspired, featuring both live and on-demand Webinars that show educators how to effectively use Math Nspired to build student understanding of core math concepts.
mathnspired.com

Product Tutorials

TI has teamed with award-winning training provider Atomic Learning,™ HotMath and WatchMe Ware to create a library of free product tutorials on TI-Nspire™ technology, the TI-84 Plus Silver Edition graphing calculator, the TI-30XS MultiView™ and TI-34 MultiView scientific calculators and the TI BAII Plus financial calculator. education.ti.com/tutorials.

T³ Online Courses

Convenient for your schedule, several of these courses also offer graduate or continuing education credit for a fee.

T³ Graduate & Continuing Education Credit

Committed to teacher success, TI offers CEUs and graduate credit for select professional development opportunities.
education.ti.com/onlinecourses

More Than 100,000 Educators Have Benefited from T³ Professional Development.

T³ provides high-quality professional development for educators who want to teach more effectively using educational technology in their instruction. Now in its third decade, the program has reached more than 100,000 educators worldwide.

For more information, visit education.ti.com/t3.

» Research on TI Technology

Research on TI-Nspire™ Technology
“TI-Nspire technology’s ability to save all student work (in documents) enables reflection, formative assessment and continued learning outside of class time – activities shown to increase student learning.”

Research on Teaching and Learning with Graphing Calculators
“Studies indicate when students use graphing calculators both in and out of class, they tend to score higher on national, state and school-level tests.”

Research on Learning Gains from Teaching with Graphing Calculators
“Teaching with graphing calculators, using the techniques identified as successful, has been shown to yield average learning gains in the range of 14% to 50%.”

Research on the TI-Navigator™ System
“Effective use of the TI-Navigator system is shown to help achieve instructional goals, including greater student engagement and understanding, as well as more class discussion and interactivity.”

Research on T³™ Professional Development
“T³ professional development services incorporate nine attributes shown to be essential to effective professional development.”

» Curricular Content

» Math Nspired Lesson Resource Center
Teach key Algebra and Geometry concepts more easily and effectively. Help students grasp concepts they struggle with most. Take advantage of this online resource to quickly begin using TI-Nspire technology in your instruction. Take a virtual tour at mathnspired.com.
Coming Fall 2010
Algebra 2 Nspired and Calculus Nspired

» Activities Exchange
Educators have access to more than 3,000 free online math and science activities. Browse by subject, state, national or Canadian provincial standards, or by textbook, and download classroom-ready activities. Share your own activities with other educators. Visit education.ti.com/exchange.

» EXPLORATIONS™ Activity Books
Download activities or purchase books with a proven heritage of helping educators incorporate TI technology into the classroom, from kindergarten through college. Visit education.ti.com/explorations.

» Getting Started Series
Free online booklets feature activities that introduce new users to the key features of TI technology, including:
» Introducing TI-Nspire Technology
» TI-Nspire: High School Mathematics
» TI-Nspire: Developmental Algebra
education.ti.com/us/gettingstarted.

» TIMath.com
Subscribe to weekly classroom activities sent to your email for Algebra 1, Algebra 2, Geometry, Precalculus, Calculus and Statistics, supporting TI-Nspire™ handhelds and software, TI-84 Plus and TI-89 families of graphing calculators.

» TIMiddleGrades.com
Find math and science activities, and educator resources, to help middle grades students build a foundation for success using the TI-73 Explorer™ graphing calculator.

» TIPhysics.com
Sign up to receive weekly Physics activities by email, and find Physics activities that use TI-Nspire technology.

Textbooks and TI Technology
An increasing number of publishers are adding TI-Nspire technology content. TI-Nspire activities offered by different publishers can help educators give students the opportunity to interactively explore concepts first introduced in the textbook. For more information, visit education.ti.com/activities.

Publisher Connections
For more than a decade, TI has partnered with publishers to integrate TI technology into their textbooks and supplements, including:

» TI MathForward

TI MathForward™
“It’s really pushed me as a teacher, and I feel that professionally I’ve grown a lot just by using this program.”
-- Heather Roberts, Mathematics Educator, Texas

Improving student achievement in mathematics
The TI MathForward program can help schools and districts achieve and sustain middle grades algebra readiness and high school algebra success with a comprehensive, research-based[†] approach.

Acceleration, not remediation
TI MathForward combines instruction, professional development, curricular content and technology in a unique program ready to deliver the results needed to meet state standards and testing. Schools and students say TI MathForward:

- » Builds teachers’ content knowledge and confidence
- » Requires less tutoring outside the classroom
- » Builds a foundation for mathematics success
- » Encourages student interest in taking more advanced math courses
- » Provides sustainable, positive change

TI MathForward helps students learn more and builds on existing investments in curriculum and technology.

Move Forward
See the TI MathForward program in action. Learn how it can increase student success and help your school or district meet its goals.

Visit TImathforward.com.
Call 1.877.4MYTIMATH (469.8462)
