Instructions for Using Words, Words, Words

Installing the Module

The Super Speak & Spell™ unit comes with a protective cover installed in the module port. You must remove it before installing a module.

Note: You can only install one module at a time.

1. Turn the Super Speak & Spell unit off.
2. Grasp the protective cover by the thumb and finger grips and pull it out gently but firmly.
3. Slide the new module firmly into the unit until it clicks.

Using the Module

At any time during play, you can switch between the built-in vocabulary and the words in the installed module. Press **module** to select the Words, Words, Words module. The words YELLOW MODULE (its color) appear in the display. Super Speak & Spell then says the name of the module and switches to the vocabulary in the module.

To return to the built-in vocabulary from the module, press **module** again. The display shows MY WORDS.

If the module is accidentally removed during use, reinsert it, press **on**, and start the activity again.

Module Vocabulary and Activities

This module contains vocabulary words suitable for children ages six through twelve. When the module is installed and selected by pressing the **module** key, the eight activities use these words instead of the built-in vocabulary.

Service Information

For service or product information, call 1-806-747-1882. (We cannot accept collect calls at this number.) You may also write to the following addresses.

For information:
