

# INSTALLATION INSTRUCTIONS

1. Install the calculator on the vinyl organizer. First, gently slip the top of the calculator under the middle strap. Then slip the bottom edge of the calculator into the bottom strap.

2. Install the Visor Kit on the visor. First swing your car visor down as you would to block glare through the windshield. Then clip the Visor Kit on the top of the car visor so the calculator is visible with the visor down.

**CAUTION: BE SURE THE CALCULATOR IS POSITIONED SO THAT IT IS SHADED FROM DIRECT SUNLIGHT WHEN NOT IN USE**

# TI-1850 VISOR KIT

To calculate MPG/KPL

$(\text{Odometer at latest fill-up}) - (\text{Odometer at previous fill-up}) \div (\text{Latest GAL/Lit}) = \text{MPG/KPL}$

To convert liters to U.S. gallons:  $(\text{Liters}) \div (3.7854118) = \text{U.S. gallons}$

DATE	\$ AMT	MILE KILO	GAL LIT	MPG KPL	DATE	\$ AMT	MILE KILO	GAL LIT	MPG KPL

NOTE: Extremely high or low temperature will affect appearance of calculator display. See Owners Guide for details.
